

How To Open Your Project

Simple guide to open project

Follow the steps below to open your project in eMStudio32.

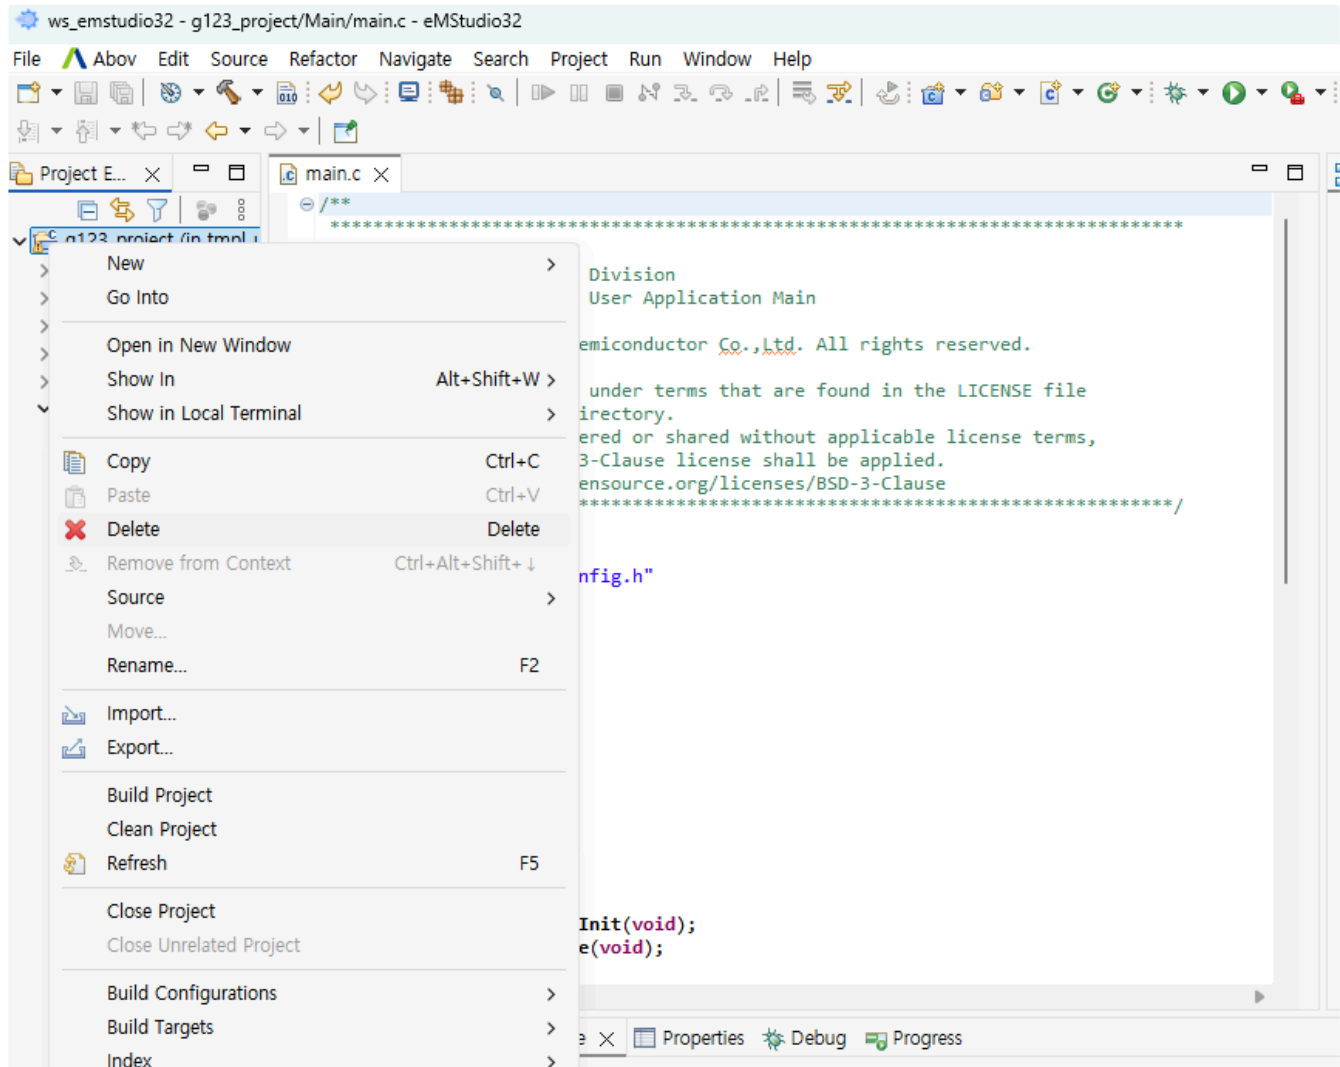

How To Open Your Project

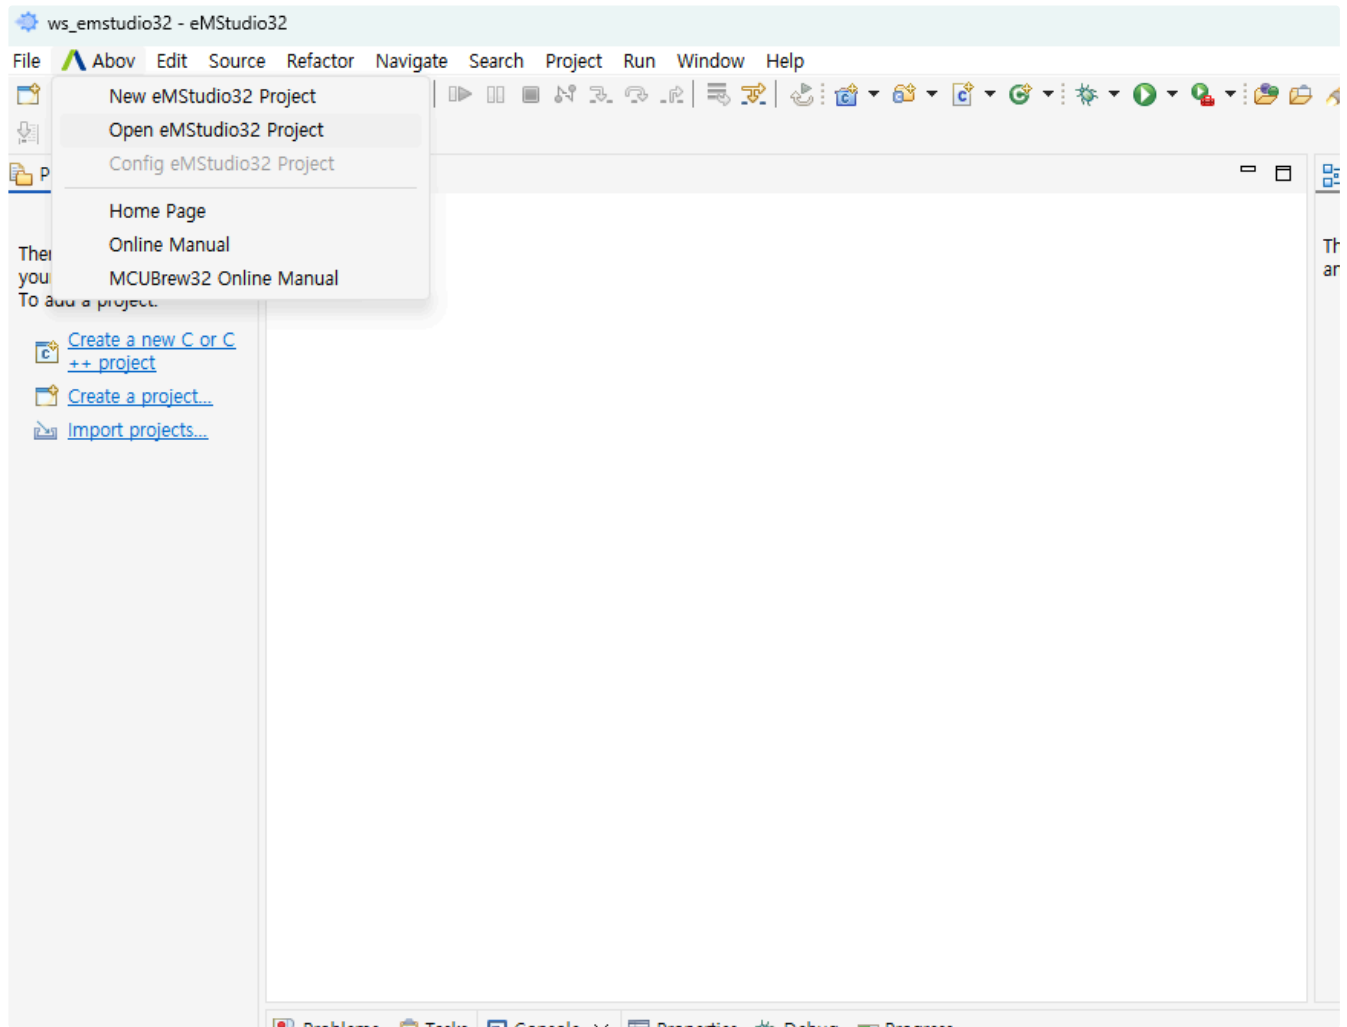

This section assumes that you have created a project at
D:\work\eclipse_workspace\ws_emstudio32\g123_project .

You are able to see a target directory from
"eMStudio32_Project_Directory"\Generation\AUDK32_A31xxxx-
1.0.7\Example\Build\Eclipse\Tmp1UserApp\Workspace\tmp1_userapp" .

After selecting a project name, you can close the current project by right-clicking it and choosing **Delete** from the context menu.

You can open a project by selecting **Abov -> Open eMStudio32 Project** from the top menu.

And select a location by **Directory** button, you are able to find a location at below path.

```
"Generation\AUDK32_A31xxx-1.0.7\Example\Build\Eclipse\TmpUserApp\Workspace\tmp1_userapp"
```
