

Installation

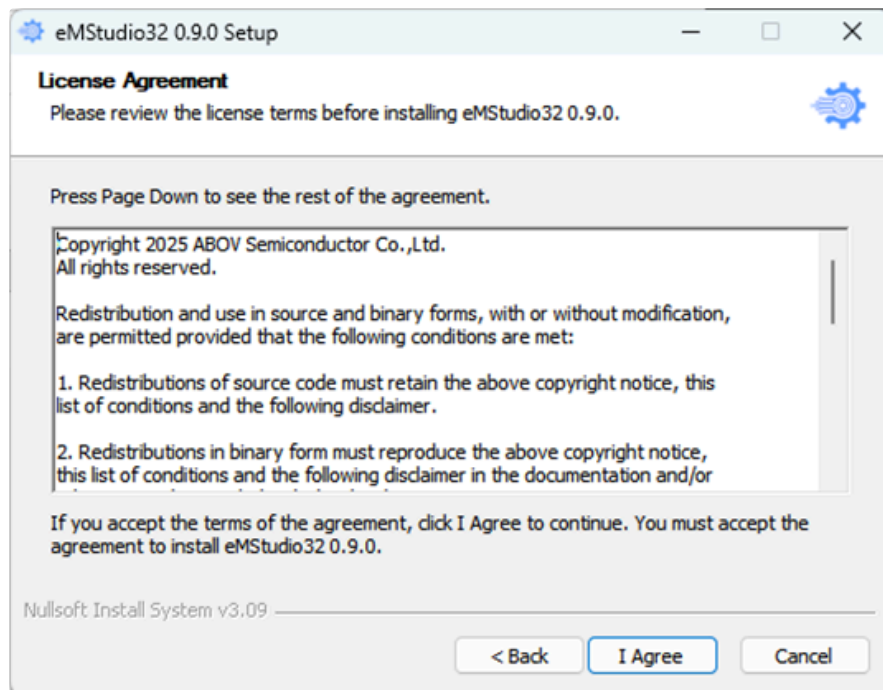

1. Download and run setup file from [eMStudio32 release page](#)

Run the setup file and click “Next” button to install eMStudio32.

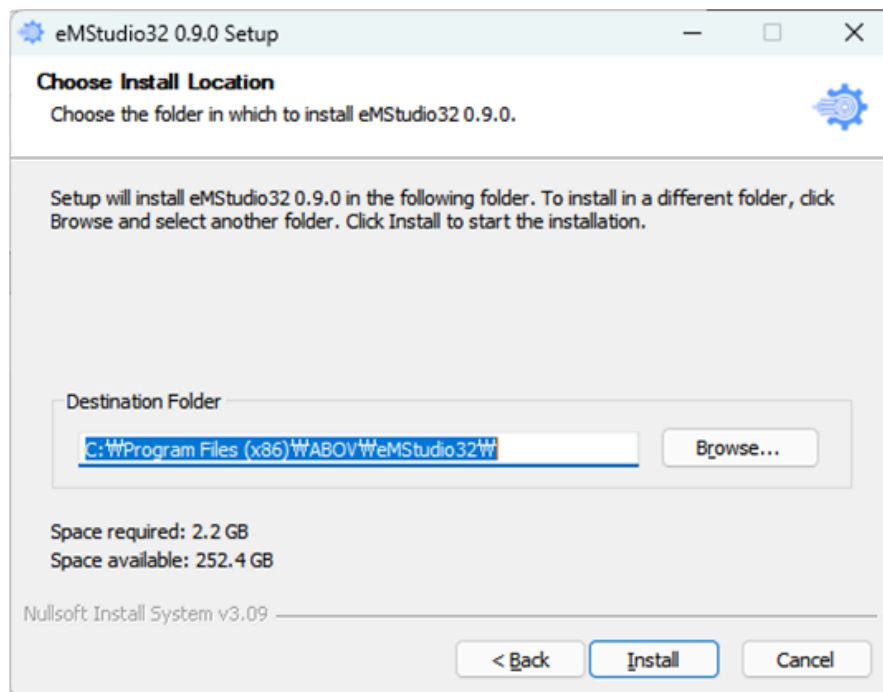

2. License Agreement

Select “I Agree” button when you see a License Agreement page.

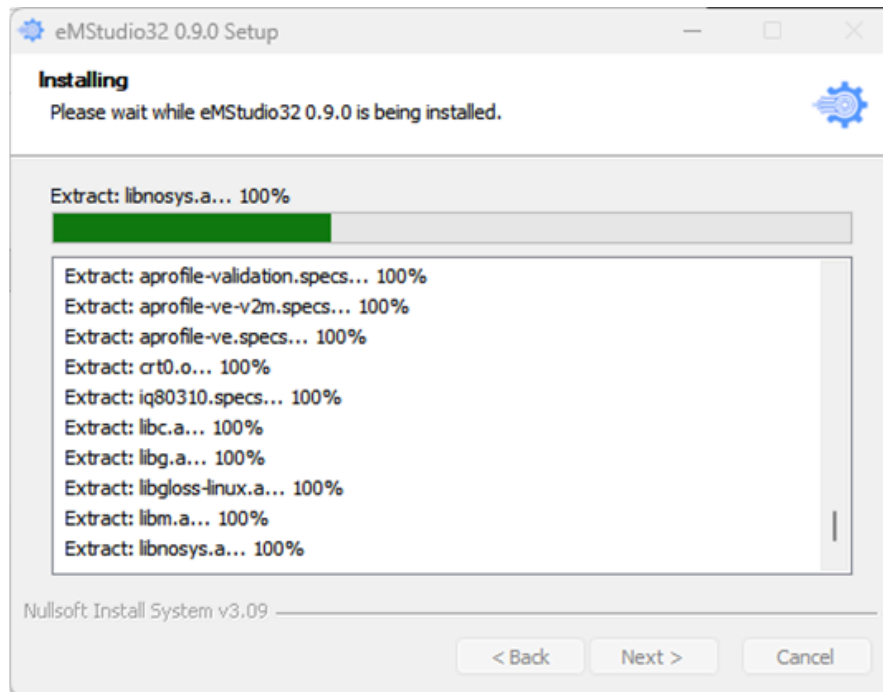

3. Select a location and start installation

Select the installation directory of eMStudio32 on your disk, and click “Install” button to start a installation.

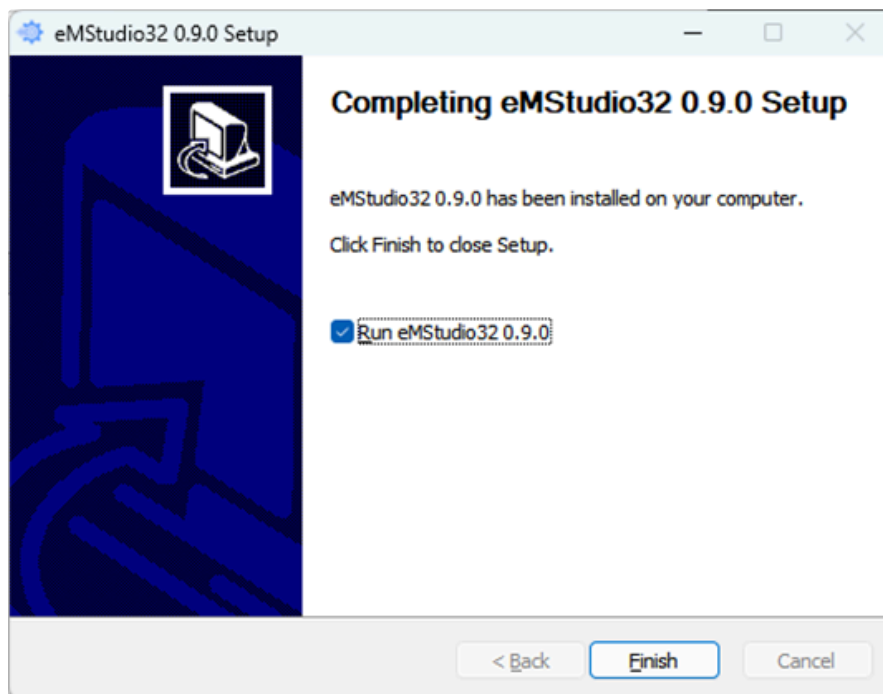

4. Install eMStudio32

Installation wizard starts the installation of eMStudio32.

5. Complete installation

Select “Finish” button at the final installation step and then eMStudio32 will start by default.

6. Launch eMStudio32

eMStudio32 will start with “Welcome” page as below.

The screenshot shows a web browser window titled "ws_emstudio32 - eMStudio32". The browser's address bar shows "ABOV Wiki" and a search bar. The left sidebar contains a navigation menu with the following items: Spaces, Apps, eMStudio32 (selected), Content (with a search bar and links to Manual Release and Official Release Distribution), 99 Blogs, Calendars, Teams, and More. The main content area displays the "eMStudio32" repository page. It features a header image of four large industrial metal brewing tanks. Below the image is a yellow beer mug icon. The page title is "eMStudio32" with a sub-header "Introduction". The text on the page reads: "Welcome to the official repository of eMStudio32. eMStudio32 is an IDE (Integrated Development Environment) built on Eclipse, designed to support the development of ABOV 32-bit MCUs based on ARM® Cortex-M cores. Key strength lies in its integration with MCUBrew32, which allows intuitive configuration of pin multiplexing, clock trees, and peripheral selected, and enables automatic generation of simple starter code. For more information about MCUBrew32, please visit the [official MUCBrew32 homepage](#). eMStudio32 mainly provides a GNU-based toolchain within the familiar Eclipse environment, leveraging the powerful features of MCUBrew32:" followed by a bullet point: "• Popular and widely-used Eclipse IDE environment". At the bottom left, a message states: "You're viewing this with anonymous access, so some content might be blocked."
